

BackendInterface

adder

Serializer

Calculator

```
graph BT; Calculator[Calculator] --> adder[adder]; Calculator --> Serializer[Serializer]; adder --> BackendInterface[BackendInterface];
```

The diagram illustrates a class hierarchy and association. At the bottom is the 'Calculator' class, which is shaded gray. It has two arrows pointing upwards to 'adder' and 'Serializer' classes. The 'adder' class has an arrow pointing upwards to the 'BackendInterface' class. All classes are represented by rectangular boxes with black borders and text. The arrows are blue.
